High Density 90 Watt Desktop Power Supplies are CEC/Green Power Compliant

APS is proud to announce the release of the KSAFK Series of CEC / Green power Compliant 90 Watt Desktop Switching Power supplies that measure only 5.91 x 2.28 x 1.37". These supplies are ideal for applications in any mobile electronic application such as LCD monitors, notebook computers, networking, printers, test equipment, and much more.

These external / desktop power supplies feature Universal AC Input with Active Power Factor Correction and 11 output models with single outputs ranging from 12~24 VDC. These supplies consume less than 1 watt of input power under no load conditions to comply with CEC / Green power initiatives. Packing 90 Watts in only 5.91 x 2.28 x 1.37", these supplies provide an uncommonly high power density of just under 5W/in³. Other standard features of this supply include an on/off switch that is mechanically designed to eliminate accidental turn-on / off; Over-Voltage Protection; Over-Current Protection; and Short Circuit Protection. These supplies are safety certified to UL60950-1, CAN/CSA C22.2 NO.60950-1, EN60950-1/A11:2004, CE (Low Voltage Directive), AS/NZS 60950:2000 A1 and PSE IEC60950 for applications throughout the world with FCC / EN55022 Class B Emissions. For greater flexibility, these supplies may be configured with a wide selection of standard DC Output Connectors.

All supplies are in full production with evaluation quantities available from stock and production deliveries of less than 8 weeks. Specifications are available for download from www.advpower.com/ksafk-90w.pdf.

Pricing is as low as \$21.00 for 1000 piece quantities. Contact APS at 925-734-3060 or sales@advpower.com for sales & technical support.
